Propafenone - only if provider considers	CYP2D6 / 81226 or eligible panel	PASS if actually CONSIDERED	PASS - I50.9 Group 4	Prospective candidate; provider confirmation required

3. Coding / Billing Logic

Rule	Application
81418	Novitas requires at least 6 genes per descriptor, including CYP2C19, CYP2D6 and CYP2D6 duplication/deletion analysis; claim narrative must identify additional genes.
Individual-gene fallback	Use only for actually reasonable/necessary gene-drug-diagnosis relationships. CYP2C9=81227; CYP2D6=81226; SLCO1B1=81328.
Drug identification	For Part B claims, the drug(s) in consideration requiring PGx testing must be submitted in the applicable detail line 2400 loop.
Documentation	Record must support selected ICD-10, CPT/service, and the drug(s) being considered and indication.

4. Provider Authorization / Release Gate

Gate	Status
Novitas drug-gene crosswalk	[X] COMPLETE
Novitas diagnosis crosswalk	[X] COMPLETE - no full CURRENT match
Provider trigger response	[] PENDING - propafenone / listed SSRI questions
Accurate additional diagnoses, if clinically present	[] PENDING / NONE PROVIDED
